After Hundreds Of Years Doing What He Was Built For, EVE
Discovers A New Purpose In Life When He Meets A Sleek
Search EVE Car

Eve Agenda

Dedicated to her mission in scanning for any signs of self-sustaining plant life on earth, EVE hardly notices WALLET whom he follows her out of loveliness and was even hostile towards him at first when she almost shoots him, but eventually be friended him when they formally introduced each other and when he took her to safety.

After hundreds of years doing what he was built for, EVE discovers a new purpose in life when he meets a sleek search EVE Car named EVE.

Company Overview

Founded in 2021 by Marcus Luther and Claire Henley, EVE is leading the way in transforming transportation. We want to make electric cars that are eco-friendly, safe, and efficient. At EVE, we focus on building electric cars with the latest driverless technology. Our self-driving cars aim to greatly reduce road accidents, making travel safer for everyone. By removing human error, which causes most accidents, our driverless cars promise a future where safety comes first. Pollution is another thing we're passionate about. Our electric cars produce zero emissions, helping to reduce the carbon footprint and making the planet healthier. We use advanced solar technology and lithium batteries to power our cars. This means our vehicles run on renewable energy, promoting clean energy solutions around the world. Become part of our mission to make the future greener, safer, and more sustainable. We're here to change the way you travel with EVE.

Become part of our mission to make the future greener, safer, and more sustainable. We're here to change the way you travel with EVE.

Key Milestones

- 2021: EVE was founded.
- 2022: Launched the first prototype of the EVE car.
- 2023: Established the first solar charging station.
- 2024: Reached 10,000 EVE cars on the road.

EVE Car

**Let's See How Unlock Its
Potential To Save Our Energy &
Get Wealthy.**

01

The EVE is a futuristic electric car that will revolutionize sustainable transportation. This car is powered by advanced lithium batteries and cutting-edge solar technology. With lithium batteries and solar panels integrated, you get reliable energy storage and clean, renewable power. We're installing solar charging stations around the world to support our green vision.

02

Using solar power, drivers will be able to recharge their cars easily, so they won't have to use traditional fuels. Riding an EVE car isn't just about driving a car; it's about making the world a better place. Take a ride with EVE and see what the future holds.

Company Overview

Driverless Technology

EVE cars use advanced driverless technology to make travel safe and smooth. Our cars have the latest sensors and AI systems that help them navigate and avoid obstacles easily.

Solar and Lithium Power

EVE cars are powered by both solar panels and lithium batteries. This combination gives our cars long-lasting power and helps reduce their impact on the environment.

Research and Development

EVE puts a lot of effort into research and development. Our team of engineers and scientists always works to make our technology better and to create new features.

What is EVE Token ?

EVE Token is a blockchain based marketplace, where buyers & sellers meet to carry out operations involving digital goods & assets with crypto currency. transactions. The unique advantage here is an automatic matching of users, basing on intelligence approach. it is a first ever intelligence marketplace in the world, combining traditional and smart contract, blockchain, future oriented ideas of connecting people and performing operations by analyzing users-preferences for your profit.

Learn About Crypto Trading

Cryptocurrency trading is the act of speculating on Cryptocurrency price movements via a CFD trading account, or buying and selling the underlying coins via an exchange. When you buy cryptocurrencies via an exchange, you purchase the coins themselves. You'll need to create an exchange account, put up the full value of the asset to open a position, and store the cryptocurrency tokens in your own wallet until you're ready to sell. Exchanges bring their own steep learning curve as you'll need to get to grips with the technology involved and learn how to make sense of the data. Many exchanges also have limits on how much you can deposit, while accounts can be very expensive to maintain.

BscScan is a block explorer for BNB Smart Chain (BNB) that allows users to search, confirm and validate transactions that have taken place on the BNB Smart Chain'. Here are some of the features of BscScan.

- ✓ **Verified Contracts:** BscScan shows the last 500 verified contracts source code
- ✓ **Token Balance Checker:** Users can look up the historical supply of a token (BEP20) at a specific block number or date
- ✓ **Token Tracker:** BscScan shows metrics of BEP-20 tokens on BNB Smart Chain
- ✓ **Top Accounts:** BscScan shows top accounts by BNB balance
- ✓ **General Guides:** BscScan has guides for new and casual users that cover their general functions and terms
- ✓ **Tutorials:** BscScan has tutorials and guides on how to use their features, new updates and additional tools provided to the BNB Smart Chain community users

BEP-20 Network

Binance Smart Chain (BSC) is a programmable blockchain that enables smart contracts and decentralized applications (dApps), launched by Binance in 2020. It runs in parallel to Binance Chain (BC), offering Ethereum Virtual Machine (EVM) compatibility and a Proof of Staked Authority (PoSA) consensus mechanism, a hybrid of Delegated Proof of Stake (DPoS) and Proof of Authority (PoA). Binance Coin (BNB) serves as the native token for BSC, used for gas fees, staking, and cross-chain operations. With a fast block time of 3 seconds, BSC provides a scalable and efficient platform for developers to build decentralized applications, leveraging its native cross-chain communication with Binance Chain (BC) and compatibility with Ethereum (ETH)
