EVE TOKEN

Executive Summary

EVE TOKEN is a financial revolution all set to change the way users transact. This Binance based multi-utility cryptocurrency is the initiative of EVE TOKEN GROUP.

The group is an undisputed leader in the domain of foundation transportation and forex trading. The initiative has successfully received funding from many multibillionaire investors from all parts of the world.

Many prominent fund managers are also associated with the organization. These fund managers are loaded heavily with the wealth of experience required to deal with trading in forex. EVE Token is being introduced to add a new value to your experience of financial transactions. In simple words, a reliable process for safe, speedy and affordable international transactions without any mediation is the objective of this financial revolution.

EVE TOKEN

Full Proof Security

Multi-factor biometric authentication model is the base of EVE TOKEN security protocols. This is to make sure hackers do not get even a single point to attack.

We are committed to ensuring role-based access to the system for all of the registered EVE TOKEN users.

This is why every user's access to the system will be authorized, authenticated and logged.

A team of heavily experienced security professionals will be deployed for continuous autonomous monitoring of logs.

The team will also actively take countermeasures based on AML integrations for blocking access of suspect users.

Implementations of security protocols will help ensure secure mobile access for users. Moreover, our system will become easy-to-use for our registered users.

EVE TOKEN Group is committed to developing EVE TOKEN ecosystem applications to ensure highly secure access.

Partners will help ensure cyber security systems based on artificial intelligence. The end-to-end rotation system will also be an essential part of the security system.

This is to keep all types of sensitive data encrypted. The use of end-to-end rotation SHA algorithms will play an important role.

All sensitive transactions will be verified through fingerprints, facial recognition and voice recognition system.

KYC, MSB, AML, timely backups and contingency plans will also be an essential part of the security process.

Cold storage solutions, multi-signature wallets, online/offline auditing of security will also play a key role in making EVE TOKEN ecosystem applications secure.

All this will mainly ensure direct access to cryptocurrencies and blockchains to carry out transactions.

Another important thing all users will get is is the cross-platform support for iOS/Android and web apps as a part of the security process.

The group will do everything to make sure that the security measures incorporated in apps continue up-gradation in future also.

As a part of the EVE TOKEN ecosystem security process, some more key things will be ensured. For example:

EQUAL PARTICIPATION:

EVE TOKEN believes in fair distribution of token.

The price of EVE TOKEN will remain stable during the ICO campaign. This is to make sure that a greater number of small level investors do not take most of the offer.

EVE TOKEN

Management And Government

By buying Patormine Tokens, you not only get a smart digital currency but you have also unintentionally or intentionally become a part of something great. That something great is the new economic boom of the digital smart token network on the Blockchain ecosystem.

Unlike most physical currencies, the digital-currency is issued according to fixed rules. The real idea behind EVE TOKEN was to create a digital currency with a value that couldn't be monopolized or controlled by any central authority. The sooner this rationalization hits the public, the quicker they will draw to use the EVE TOKEN against various networks of service. The true value and beneficiary of using our smart token is to be able to reap direct benefit without having to share with any intermediaries.

The list of those professionals includes but is not limited to the following:

- ✓ Finance.
- ✓ Legal.
- ✓ Investment field-competent C level executives.
- ✓ Accountability.
- ✓ Auditing.
- ✓ Compliance.
- ✓ Regulatory Banking.
- ✓ Monetary Authorities.
- ✓ Services.
- ✓ Policies.

CIRCLE- Trust and transparency in Communication

EVE TOKEN's mission is to empower the community by making seamless products that help people daily. CIRCLE is a tokenized chat and dating system that verifies the user base and stores data on the immutable block chain. It incentivizes users via the EVE TOKEN token to chat and communicate with people. Users would be able to earn tokens through actions such as fully completing their profile, sending pictures and videos, and chatting with their loved ones.

Chat apps, by nature, contain a lot of sensitive information. These databases, if breached, could expose sensitive information. Dating apps aren't also very good at retaining users. Matching algorithms on dating sites aren't great. In a recent study published in

a Psychological Science Journal, bots were terrible at pairing potential couples compared to humans. As a result, singles and couples face numerous challenges finding love and maintaining their relationships on dating sites.

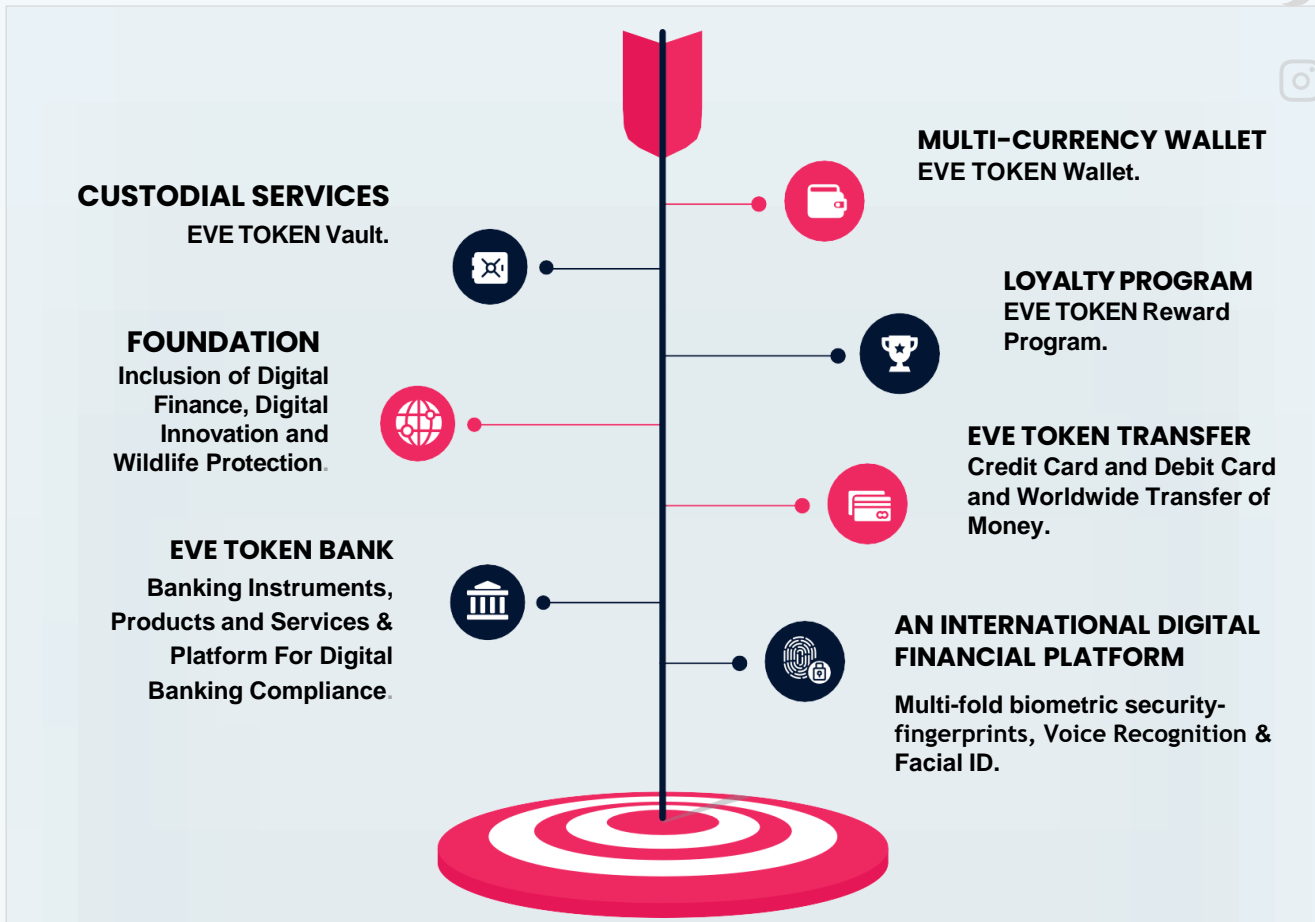

EVE TOKEN

Business Ecosystem

The group is also the issuer of this cryptocurrency based on BEP-20 protocol. This is to ensure an ecosystem of business financial applications for worldwide circulation of EVE Token. This decentralized token has been designed to address holders' daily needs related to the financial transactions.

In simple words, this multi-utility token will add value to the financial transaction related experience of users. It will change the way people transact these days.

Strategically developed financial and commercial partnerships make it a multi-utility token that offers more value to holders. This is the value users usually do not get from other cryptocurrencies.

It is mainly because EVE TOKEN allows holders to access to the following within its ecosystem:

- ✓ Access to the platform.
- ✓ Access to the benefits.
- ✓ Access to discounts and other things.

PATRONMINE COMPONENTS ACCESSIBLE TO TOKEN HOLDERS:

The group has successfully identified strong reasons for the existence of EVE TOKEN. This is a huge reason why all components explained below are an essential part of the EVE TOKEN ecosystem.

SPEED:

Transactions beyond geographical boundaries get completed in 9 seconds only. Therefore, the receiver does not have to wait for days to receive their money.

ACCESS/MOBILITY:

No need to carry any cash or credit/debit cards for payments at shops, malls, restaurants, hospitals, airports, train/bus terminals etc. EVE TOKEN, a multi-utility decentralized financial convenience, can be trusted for digital payments and high-quality financial experience like never before.

- ✓ Bitcoin launched in 2009, is the world's leading cryptocurrency through market capitalization.
- ✓ Bitcoin, unlike fiat currency, is generated, circulated, exchanged, and processed using a decentralised ledger mechanism known as a blockchain.
- ✓ Bitcoin's record as a store of exchange has been volatile; the blockchain increased dramatically up to about \$20,000 per coin in 2017, and less than 2 years later, it was traded with less than half of that.
- ✓ As the first cryptocurrency to achieve mass acceptance and success, bitcoin has influenced plenty of other cryptocurrencies in its wake.

TOKEN SUPPLY

All supply of EVE TOKEN is capped. Therefore, at least, 50% of the EVE Tokens were made available for trading after the successful launch of the network platform.

Team and advisors will get access to the EVE TOKENS for distribution after one year of ICO.

EVE TOKEN has kept reserve coins in custody. This will help deal effectively with issues related to losses, hackers and among others. If it does not happen, all reserve coins will be released after the distribution of public sale of coins.

Qualified and institutional investors will be issued tokens only according to their local regulations of their respective countries.

Market will get limited supply of EVE TOKEN initially. This will result in supply fixing. The demand for tokens may reach the next level due to the market conditions. This may or may not help token holders earn capital gains.

EVE TOKEN

Why EVE Token ? Network Token ICO

We have been making the best possible efforts to research, prepare and develop multiple components and strategies responsible for the design of EVE TOKEN cryptocurrency and its launch and growth.

We have created this cryptocurrency with the objective of transforming the way people transact these days.

EVE TOKEN is a unique and innovative asset-backed cryptocurrency combined with the Blockchain technology and a wide range of physical assets.

It is a cryptocurrency developed to help users access their cryptocurrencies and FIAT currencies anytime and from any part of the world. In this way, EVE TOKEN helps deal with the most critical issue related to the worldwide adoption of cryptocurrency.

The group has decided to accomplish a number of key issues with it. This is why the continued development of this decentralized token and relevant apps will be important for the following:

- ✓ To back the EVE TOKEN ecosystem.
- ✓ To underwrite the universality of EVE TOKEN.

EVE TOKEN business ecosystem is fully scalable, professional and independently managed with the following:

- ✓ A portfolio of diverse asset types.
- ✓ A digital banking platform.

The list does not end here only. All these things collectively add a new value to the value of EVE TOKEN. Its usage and market demand for routine transactions in everyday life could be the reasons.

Since it is always likely to be an asset-backed decentralized token, its market value will depend on time.

The rest of the things about EVE TOKEN have been specified in this whitepaper.
